There are _____ apples in each basket.

Show 3 different ways to partition a square into fourths.

Color a fourth of each square.

- ☐ 3:00
☐ 12:00
☐ 12:15

Hiccup Headache

I drank my milk too fast and I got the hiccups. I bet I hiccupped 100 times! I had to stop them before I went crazy. A notion popped into my mind that holding my breath would work, but a few seconds later..."Hic!" What if I stood on my head? "Hic!" Could I drink a glass of water from the wrong side of the glass? "Hic!" After that I was all wet and I *still* had hiccups. Just then my sister came in. She told me that she had the perfect solution. All I had to do was take off my shoes and socks. She brought in a feather and pretty soon I was laughing so hard I couldn't hiccup at all. Her notion was pretty smart, so I'm going to keep that feather close, just in case.

Why do you think he's going to keep the feather?

- In case the hiccups come back.
- He collects all kinds of feathers.
- He wants to tickle his sister.

Tell about the problem in the story. Then tell how the problem is solved.

What is the character's goal?

Problem!

Solution!

How does the solution help the character reach his goal?
