# Oak Tree Life Cycle Directions

Directions for Use:

Print and cut out each of the cards. (Do not cut apart the cards on the self-checking sheet.)

Laminate if desired for durability. Place the cards in a stack. First teach children the life cycle of the oak tree by showing the pictures one at a time, in order, and discussing with the children the features of the oak tree at each stage of its life.

These can be placed in a science center. During center time, children can place the cards in sequential order, using the self-checking card, if needed.
